Art Unit: 3611

1. In the Remarks, applicant requests an initialed copy of the IDS that was filed April 2, 2001. It appears that an initialed copy of that IDS, as well as the IDS that was filed January 30, 2003, were attached to the office action that was mailed on February 6, 2003. In any event, copies of these IDSs are attached to this office action.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 18, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Triplett (as cited by applicant).

See the rejection of paper number 13. It is noted that the crawler assembly 35 is asymmetric about various axes. For example the assembly is asymmetric from top to bottom.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-5, 9-14, 18-22 and 26-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Porubcansky '535 in view of Triplett.

See the rejection of paper number 13.

6. Applicant's arguments filed June 30, 2003 have been fully considered but they are not persuasive. At page 5, applicant urges that in the Triplett reference "there is no suggestion that the crawler assemblies (35) are interchangeable". To the contrary, as was specifically pointed

Art Unit: 3611

out in the final rejection, Triplett expressly states that "the roller unit 35 is interchangeable" (col. 4, line 3).
